

Big-Bag Unloading And Filling System

RGS provides you big bag unloading system with pneumatic conveying, to move products easily directly from big bag. It is used in ceramic, wine and food industry and its various versions are:

- *SB1: It is for only lower structure (it is necessary a fork-lift to support the big bag)
- *SB2: It is made up of upper bracket for the support of the big bag and lower structure
- *SB3: It is made up of lower structure and predisposed for hoist rail

All models equipped with coated stainless steel and could be joint with weighing system.
